◦ SKILLS ◦

Typescript/Nodejs
React
Django/Express REST API's
SQL/NoSQL
GraphQL
NextJS/GatsbyJS
Python
AWS
.NET
Java/C#
Git

PROFILE

Integrating systems via REST API's and user interfaces excites me! My goal is to apply best practices while ensuring an exceptional user experience in web application design.

EDUCATION

B.S., Stevens Institute of Technology, Hoboken

August 2019 — December 2022

Graduated with High Honors - GPA 3.73

EMPLOYMENT HISTORY

Software Engineer at Narmi, New York City/Remote

January 2023 — Present

I built end to end product features covered by unit tests in python. I built reusable React UI components for our public design library. I converted product UI components from Javascript to Typescript. I deployed our applications to AWS EC2 instances, and automated infrastructure tasks ran on our EC2 instances. I built custom lambda functions at a per customer basis to solve a specific need that our product suite doesn't offer.

Application Developer at Oak Hill Advisors, New York City/Remote

March 2022 — December 2022

I established endpoints for event-driven, serverless cloud-native REST APIs developed in a .NET microservices environment. I built Lambda functions invoked by our API Gateways to solve business needs. I gained experience with SQS/SNS, RDS, and Secrets Manager. I developed a microsoft VSTO application to allow business users to upload asset backed financing relationships to our database. I automated SFTP's for agreement documents leveraging these relationships.

Software Engineer at Candor Co., Remote

August 2021 — November 2021

I gained experience with NextJs, REST API development, AWS S3 Buckets, and AWS Aurora (PostgreSQL). I built out fullstack features with NextJs's integrated ExpressJs server and its TypeScript/React frontend.

Web Developer at Stevens Institute of Technology IT, Hoboken/Remote

April 2020 — August 2021

I was a web developer for the Enterprise Web Services division of IT. I primarily worked with GatsbyJS, and I was able to gain a lot of experience with React and GraphQL. I rebuilt our faculty profiles using GatsbyJs. I also gained experience working with PHP and drupal 7. I was also able to gain experience with WCAG 2.1, wireframing, and creating epics.
